

Mechanical Equipment of Buildings a Reference Book for Engineers and Architects, Vol. 1 (Classic Reprint)

Excerpt from Mechanical Equipment of Buildings a Reference Book for Engineers and Architects, Vol. 1 This book is a new departure in the literature on the mechanical equipment of buildings; It proposes to deal not only with the heating and ventilation of buildings, which are considered in this first volume, but also (in subsequent volumes) with power plants, elevators, lighting systems, refrigeration plants, sprinkler systems, vacuum cleaning, and plumbing. About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books. Find more at www.forgottenbooks.com This book is a reproduction of an important historical work. Forgotten Books uses state-of-the-art technology to digitally reconstruct the work, preserving the original format whilst repairing imperfections present in the aged copy. In rare cases, an imperfection in the original, such as a blemish or missing page, may be replicated in our edition. We do, however, repair the vast majority of imperfections successfully; any imperfections that remain are intentionally left to preserve the state of such historical works.
